PREFATORY NOTE

The present volume is intended as a Supplement to the "List of Geographical Atlases in the Library of Congress," published in two volumes in 1909. It includes an author list, a description of 822 additional atlases, mostly received since the publication of the first volume, and a general index.

The author list gives the full names of the authors, with dates of birth and death when known, short titles and dates of publication of the atlases described. It has been combined with the author list contained in volume two which has been revised and corrected to date, and will serve as an index or check list of the atlases now on file in the Division of Maps and Charts.

The same subject-chronological order as was adopted in the first volume has been followed for the general description of the atlases. Each entry bears a separate number, and to facilitate researches and references from the author list and the index, the numbers (3266-4087) follow those of volume one. Accessions received after the work had gone to press are noted only in the author list, and are designated with a star. In all, the collection of atlases in the Library of Congress numbers somewhat over 4100, including the additional entries.

As before, the maps and views relating to America, plans of cities throughout the world and material of specific interest are brought out in notes and contents. In order to augment the efficiency of this Supplement as a reference work, the number of full analyses and contents of important early atlases has been increased.

Among the atlases described are several of great rarity. There is, for instance, a well preserved copy of the celebrated Antoine Lafréry's *Geografia*, published in Rome ca. 1575. Few copies of this work are known and as they greatly differ as to their contents, the differences or variations in these copies, when known, have been given. These differences consist not only in the number and kind of maps but also in various editions or states of the same maps. Besides the interesting accounts relating to Lafréry and his works, contained in Nils Adolf Erik Norlenskiöld's "Facsimile-atlas" and in Father Francisco Ehrle's . . . "La Pianta di Roma Du Perac-Lafréry del 1577," issued in 1908, both of which are mentioned in the descrip-

tive note accompanying the entry (no. 3392), there has also been published by Dr. F. Rolands, in Besançon, in 1911, a very useful bio-bibliographical study of this noted cartographer entitled: "Un franc-comtois éditeur et marchand d'estampes à Rome, au XVI^e siècle, Antoine Lafréry." This work, however, was received here too late to be consulted for additional information.

Another atlas worthy of especial notice is the rare first edition of Abraham Ortelius' "Theatrum orbis terrarum, 1570" known as the "XX Maii" edition, a copy of which the Library of Congress has been so fortunate to acquire. Besides this, 15 other editions, including the 1602 Spanish and the 1606 English editions, have been added to the collection and are here described. In all, the Library of Congress has now 60 editions of Ortelius' atlas.

Of other works listed and analyzed in the Supplement, may be mentioned particularly, the famous "Arcano del mare, 1661" by Sir Robert Dudley, styled Duke of Northumberland; six new editions of Gerard Mercator's atlas; two of Willem Janszoon and Joan Blaeu's *Le théâtre du monde*, the first in two volumes, dated 1635, the second in three volumes, 1638-40, and Joan Blaeu's *Atlas maior* in eleven volumes, 1662-65, containing 590 maps; Henricus Hondius and Jan Jansson's *Nouveau théâtre*, 1639-40; Jan Jansson's *Atlas minor*, 1651 and Neuwen atlas, 1652-53; the rare collection of maps of William Berry, 1680-89, known as the English Sanson; another copy of Sanson's *Atlas nouveau*, 1692-96; the magnificent set of nine volumes, containing 922 maps, published by Cövens and Mortier in 1689-1761; Nikolaas Visscher's *Atlas contractus*, about 1666, in which is found the well-known map entitled: "Novi Belgii novæque Angliæ nec non partis Virginiae tabula multis in locis emendata a Nicolao Joannis Visschero," with the view of "Nieuw Amsterdam opt eylant Manhattans." On the title-page of this atlas are found the following manuscript words: "Bought att Amsterdam Satturday 23^o Septemb. 1676. Præbium 9 rix dollars (i. e.) 45/8. Anto fletcher." The Supplement contains also descriptions of four additional copies of the *Atlas minor* of Nikolaas Visscher.

The work entitled: "*La Galerie agréable du monde*" published at Amsterdam in 1729, by Pieter van der Aa, although not strictly speaking an atlas, contains such wealth of cartographical and pictorial material relating to cities and forts of the various countries of the world, that the maps, plans and views, numbering 1525, contained in the sixty-four volumes of this admirable collection have been fully listed.

The index, bringing out the information contained in the titles, the contents and the notes, contains over 33,000 entries. It will no doubt prove its usefulness as fully as the index contained in volume two.

Owing to my own recent protracted illness, the labor of preparing the index has fallen upon my associates, Mr. Oswald Welti (Acting Chief of the Division during my absence) and Miss Mary D. Wightman, whose intelligent and most painstaking service in the matter, as well as the hearty cooperation of the entire staff of the Division, I acknowledge with gratitude.

A compleat body of ancient geography, both sacred and profane, exhibiting the various empires, kingdoms, principalities, and common-wealths, throughout the known world . . . To which is prefixed, a copious introduction to ancient geography: containing an account of the origin of kingdoms, and the various changes they have undergone; interspersed with critical remarks upon several ancient and modern geographers, whose mistakes are pointed out and corrected. Now first translated from the latin . . . 3rd ed., enlarged with 11 maps of Laurenberg and Blanchard. 2 p. l., 36 pp., 61 maps on 130 l., 1 pl. fol. The Hague and sold by T. Osborne . . . The preface reads as follows: "It would be needless to trouble the reader with a large account or preface concerning this piece of ancient geography, which is so universally esteemed for its excellency . . . Wherefore we shall only take notice, that the several impressions which have been printed (with the latin introduction of Hornius or Van Horn) without any manner of additions or corrections, being grown at present very scarce and dear, we have undertaken to supply the public with a more accurate edition of it, augmented with many of Laurenberg's and Blanchard's maps . . . We have likewise, for the benefit of english readers, given the Introduction . . . carefully translated from the latin."

of the german edition of G. Braun and F. Hogenberg's *Civitates Orbis Terrarum* (1586) He adds, that Romanus had made this translation originally for his private use; by chance it came into the hands of the publisher N. Bassaeus of Frankfort, the same who had published the different editions of A. Saur's german *Parvum Theatrum* (which is likewise nothing else but a reprint, *geographically* arranged of the above mentioned *alphabetical* indices of Braun and Hogenberg) At the earnest desire of N. Bassaeus, Romanus permitted his translation to be printed, and for the illustration of it the publisher made use of the same views which are in Saur's work."

NOTE.—Corrected from v. 1, title 66. Engraved title and portrait of Wilhelm, elector of Brandenburg, to whom the work is dedicated. *Blad-wyser* signed: *Lud. Smids, M. D.*

The view of New Amsterdam is mentioned by Asher as the only separate view of New Amsterdam that he has seen. He calls it a copy of Allard's engraving and says: "Like all the other engravings of Schenk, this one was executed between 1690 and 1700 and most likely published in one of the various collections of views [of] different cities, published by him." Consult G. M. Asher's *A list of the maps and charts of the New-Netherland. Amsterdam, 1855. pp. 21-22.* "Mr. Asher saw the plate but did not know this work. [*Hecatompolis*] Of this work there exists a very rare edition publ. by C. Allard, 1700 [also] same work but with title: *Af teekeninge van een hondert der voornaamste en sterkste steden in Europa. Amsterdam, Jan Roman. 1752.* With printed table and index, without the portrait of the elector, the plates numbered 1-100." Consult Frederick Muller's, *Catalogue. Amsterdam, 1872. Portraits. p. 115, no. 7793-94.* See v. 1, title 67 for description of this dutch edition.

COMMERCIAL.

Atlas maritimus & commercialis; or, a general view of the world, so far as relates to trade and navigation: describing all the coasts, ports, harbours, and noted rivers, according to the latest discoveries and most exact observations. Together with a large account of the commerce carried on by sea between the several countries of the world, as likewise of all inland trade by means of navigable rivers; the rise, progress, and decay thereof, in its various branches; with methods for farther improvements. To which are added sailing directions for all the known coasts and islands on the globe; with a sett of sea charts, some laid down after Mercator, but the greater part according to a new globular projection, adapted for measuring distances (as near as possible) by scale and compass, and authorized by letters patent under the great seal of Great-Britain. The use of the projection justified by dr. Halley. To which are subjoin'd two large hemispheres on the plane of the equinoctial; containing all the stars in the britannic catalogue: of great use to sailors for finding the latitude in the night. 3 p. l., III, [2] 340, VI, 196, [11] pp., 52 maps. fol. London, for J. & J. Knapton, W. & J. Innys; J. Senex, 1728. 3298

NOTE.—Atlas is in two parts with separate title-pages. Second title-page reads: *A general coasting pilot; containing directions for sailing into, and out of, the principal ports and harbours thro'out the known world . . . To all which are prefix'd, directions to mariners, whereby the use of the globular charts is made plain and easy to the meanest capacity . . . by Nathaniel Cutler.* Published anonymously. Probably the work of John Harris, John Senex and Henry Wilson, whose names appear on map no. 23, *A globular chart showing the errors of plain, and the deficiencies [!] of Mercators sailing, and discovering the true navigation according to the globe. Invented and performed by John Harris, John Senex & Henry Wilson.* Contains a full page comment on the new projection by dr. Edmond Halley, in which he says that in this atlas the projection is different from anything that has yet appeared, and giving it his approval.

The *Dictionary of national biography*, states under John Senex: “About 1720, he, with two others made a representation to the house of commons on the subject of a new globular projection.” It seems safe to conclude that these three men are responsible for this atlas though no definite statement has been

ITINERARIES.**Aa, P. van der.**

Atlas nouveau et curieux des plus célèbres itinéraires, ou recueil de nouvelles cartes géographiques des voïages modernes de long-cours, qui ont été faits tant par mer que par terre dans toutes les parties du monde, & principalement dans l'Asie, l'Afrique, & l'Amérique, par les portugais, espagnols, hollandois, françois, anglois, & autres nations; tant sous les ordres exprès des souverains, que par des compagnies de négocians, comme aussi par des particuliers curieux et scavans, depuis l'an 1246 jusqu'à l'an 1696. La pluspart de ces cartes aiant été dressées sur les lieux par les

voiageurs mêmes, & les autres confrontées & rectifiées sur les nouvelles observations des plus habiles géographes. Sur lesquelles cartes est exactement marqué la véritable situation des lieux, & la juste étendue des limites de chaque païs, avec les routes & chemins qu'ont tenu les voiageurs. Ouvrage très-utile pour la comodité de ceux qui veulent lire avec fruit les relations des voiajes. 2 v. in 1. obl. fol. à Leide, P. van der Aa [1714] 3329

NOTE.—Erroneously dated as 1728 in v. 1, title 96. For date 1714, given here, consult van der Aa's *Catalogue de livres, de cartes géographiques . . . Leide, 1715.*

This english translation seems to have immediately followed the 2d dutch edition, and for that reason possibly is called on title-page the third edition. It is probably the first english edition.

Text is in english, in 2 parts, of 3 books each. Title-page for each book is printed on back of first map of each book, and bears the date 1639. Title-page of 2d part, 1st book, is printed "*first part*" by mistake and corrected with a pen. There are several errors in pagination. Titles of maps are given in dutch and french. Consult title (3332) for another edition with slight differences.

The Library of Congress has also the reproduction which belongs to Theobald Fischer's series of facsimiles, being no. 9 of the series published in Venezia, by F. Ongania 1871, also Peschel's preface of this date, translated into Italian by Daniel Riccoboni, and published in a separate pamphlet; and a reproduction published in Venezia, 1879, which lacks pl. 8 and the preface. Consult v. 1, title 247.

Maggiolo, V. de, supposed author.

Atlas of portolan charts. Facsimile of manuscript in British Museum. Edited by Edward Luther Stevenson . . . 4 p.l., facsim.: 20 maps, 2 pl. 4°. New York, Hispanic society of America, 1911.

3357

NOTE.—In his *Foreword*, Stevenson says of this portolano: "It appears to be not only the oldest known portolan atlas on whose charts any part of the New World is laid down but the oldest known atlas in which the coast regions of a large part of the entire world are represented with a fair approach to accuracy."

"Although neither signed nor dated, the several charts exhibited certain features which suggest the authorship of Vesconte de Maillo, and in the astronomical tables, on fol. 11b, an argument may be found for assigning it to the year 1508."

So far the earliest authentic portolano of Vesconte de Maiollo or Maggiolo is dated 1511, and bears the following inscription: "Vesconte de Maiolo cujus Janue composuy. In neapoly de anno 15.11. die xx January."

The original of the atlas which Stevenson reproduces was purchased by the British Museum in 1895. It is no. 2803 of the Egerton manuscript collection. Their catalogue of manuscripts makes the following statement in regard to it: "The tables are calculated from 1508 onward, and the maps were evidently executed about that date, probably at Naples. The volume appears to be a copy of one of the early portolani of Vesconte Maggiola of Genoa, and is the earliest italian portolano now known which shows the North Atlantic coasts of America. Consult HARRISSE's *The discovery of North America, 1892*, p. 469."

The reference in HARRISSE, however, is to the Vesconte de Maggiolo portolano of 1511.

This first impression is known as the "*xx Maii. 1570*" edition. The binding is brown calf, with rich and handsome panels of gold on a ground powdered with gold, which still bear traces of the old enamelling. On the first panel appear the name and arms of Jean, comte de Hoya, bishop of Münster and Osnabrück (1566–74) and the date 1570 tooled in gold.

The maps are the same as those in the other 1570 edition. For this edition, with a list of the maps, and bibliographical information relating to Ortelius, consult v. 1, title 374.

NOTE.—Six small maps in text. Strabo's geographical work in seventeen books, translated into latin by Xylandro and embellished with twenty-seven of the Münster maps for Ptolemy's *Geographia*.

Nordenskiöld gives this edition in a list of pseudo-editions of Ptolemy, and comments on the work as follows: "Most of the maps of Münster's Ptolemy are inserted. They are numbered in connection with the other text and provided on the first page with the usual Ptolemaic legends, borrowed from the book viii. The supervision of the printing, however, has been done so carelessly, that the map of the world and three maps of Asia have been omitted, whereas the map of Greece and the 4th, 5th and 9th maps of Asia have been introduced twice. In the book there also appear small wood-cut maps of Euboea, Creta, Lesbos, Rhodes, Cyprus and Cphalonia. The work cannot be enumerated among editions of Ptolemy."

Lafréry, A.

Geografia tavole moderne di geografia de la maggior parte del mondo di diversi avtori raccolte et messe secondo l'ordine di Tolomeo con disegni di molte città et fortezze di diverse provincie stampate in rame con studio et diligenza in Roma. eng. title, 167 l. incl. 6 pp., and 102 maps. fol. Roma [1575?] 3392

NOTE.—Referring to this atlas Nordenskiöld, in his *Facsimile-atlas*, p. 117, says: “When, as is generally the case, the new era in cartography is counted from the publication of the *Theatrum orbis terrarum* and the merit of the reform is exclusively attributed to Ortelius, and to Gerard Mercator, great injustice is done to the draughtsmen of the excellent maps printed in Italy during the 6th and 7th decennia of the 16th century. These maps often served as models to Ortelius, and many of them may, without disadvantage, be compared with works of Mercator. Their neglect, in the history of cartography, is evidently due to the circumstance that the Italian maps were published on separate sheets and never united into such a complete and systematic work as that of Ortelius’ *Theatrum* or Mercator’s *Atlas*. Many of them are, therefore, as are several of the most important maps of the same period published north of the Alps in separate sheets, entirely lost. Others have become so rare, even in Italy, that they have generally escaped the attention of investigators into the early history of cartography. Fortunately the most important maps printed separately in different towns of Italy had, in the 16th century, already been collected in one or more folio volumes, and provided with a common title, forming a magnificent copper engraving, on whose inner field is written [the title given above]

Lafréry, A.—Continued.

"The rich border, surrounding this title . . . is interesting, because it is the first instance of *Atlas* supporting the earth globe being used in print, as a symbol for a collection of maps. Neither the year of printing nor the name of the publisher are mentioned. But the engraved title is probably the work of Antonio or Antoine Lafreri, a french artist who, together with his uncle Duchet, founded a celebrated *atelier* for copper-engraving at Rome in 1540. This atlas is therefore generally cited under the name of Lafreri's *Atlas* or the Roman *Atlas*.

"Many of the maps were engraved in Rome by Lafreri or Duchet, but notwithstanding the express statement on the title 'Stampato con studio et diligenza in Roma' the majority of them were printed in Venice or elsewhere in Italy.

"This collection is seldom mentioned in geographical literature. For example it is never alluded to by Lelewel, Humboldt, Peschel, Vivien de St. Martin, Ruge, Breusing. Probably only a very limited number of copies were originally issued, and at present this atlas is one of the greatest rarities in cartographical literature. Hence a notable difference exists as to the contents of different copies."

Nordenskiöld, further gives a catalogue (pp. 118-122) of the maps of two copies of this atlas, one of which belongs to the library of the Collegio Romano, the other to his collection.

In this list Nordenskiöld mentions 142 maps: "Nos. 1-121 comprise all the maps as well in the first volume of Collegio Romano's as in my copy of Lafréry's *Atlas*. In the library of the Collegio Romano there are further two other volumes belonging to the same collection. These consist, according to the catalogue of Castellani, partly of some of the above recorded maps, here found not in the first but in the second or third volume, partly of new editions of the maps in the first volume, and of new impressions from the old plates, but with altered dates and sometimes also with altered names of the editor and engraver and finally of the maps . . ." [nos. 122-142]

A detailed description of the copy of the Collegio Romano is found in Carlo Castellani's *Catalogo ragionato dell' opere geografiche . . . nella biblioteca del Collegio Romano, Roma, 1876*.

The work of father Francesco Ehrle, of the Vatican library, entitled: *Roma prima di Sisto v. La pianta di Roma Du Pérac—Lafréry del 1577. fol. Roma, Danesi, 1908*, contains considerable information on Lafréry and his work. In the Introduction and appendices, he tells all that is known about Lafréry down to the present time. On pp. 11-15 are found *I primi anni di Antonio Lafréry*; on pp. 15-17, *Lo speculum Romanæ magnificentiae*; on p. 17, *Gli ultimi anni del Lafréry, ed i suoi eredi*. In appendix 12, pp. 53-59 is found an account and reprint of the index of the prints for sale by Lafréry, in 1572, a copy Ehrle found in the *Bibliotheca Marucelliana* at Florence. This index contains an introduction by Lafréry: *A' Lettori Antonio Lafreri*, and is followed by *Indice delle tavole moderne di geografia*, including plans of cities and fortresses, plates of ancient Rome, plates relating to modern subjects, history, poetry, Old and New testament, portraits, etc.

The 6 pages of letterpress found between the maps contain the following:

Bet. maps, 9 & 10: *Nova et antiqua locorum nomina in Anglia-Nova et antiqua locorum nomina in Scotia*. (1 p.)

Bet. maps 45 & 46: *I nomini antichi, et moderni della Italia . . . di Giacomo de Gastaldi . . . Cosmografo*. (Dated, *Venetia, 1564*, 2 pp. on 2 l.)

Bet. maps 53 & 54: *Nomina antiqua, et recentia urbium Græciæ descriptionis* (Dated, *Romæ, . . . 1570*, 1 p.)

Bet. maps 60-61: *I nomi antichi, et moderni della prima parte dell' Asia . . . di Giacomo de Gastaldi . . . cosmografo*. (Dated, *Venetia, 1564*, (1 p.)

Bet. maps 61 & 62: *I nomi antichi e moderni della seconda Parte dell' Asia* . . . Giacomo de Castaldi . . . *cosmographo in Venetia*. 1561. (1 p.)

Besides the copies of Lafréry's atlases mentioned by Nordenskiöld, (i. e. Collegio Romano, 3 copies; Nordenskiöld, 1 copy) other copies are found in the Lenox library and the Royal geographical society of London.

On p. 136 of Nordenskiöld's *Facsimile-atlas*, is the following notice: "In the Bibliothèque Nationale there exist two sets of maps corresponding to the collection here described under the name of Lafreri's atlas. Such collections, more or less complete, are also to be found in the Royal Library at Copenhagen, in the library of the University of Rostock, in the town library of Breslau, the private library of the King at Madrid, and probably at several other places."

"The maps in Lafreri's atlas are, with few exceptions, printed or dated between 1556 and 1572. The most important of them are by Gastaldi. Others are drawn by Pyrrhus Ligorius, Antonio Salamanca, Jacobus Daventerius, Pietro Coppo, Marcus Rota Sabenzan, Georgius Tilman, Giacomo Fontana, Achilles Stazio, Bartolomeus Phaletius, Johannes Franciscus, Antonius Florianus, and Dominicus Zenoi. The most prolific engravers have been Ferrando Bertelli, Paulo Forlani, Antonio Lafreri, Sebastianus a Regibus Clodiensis, Jacobus Bossius, Fabius Licinius and Fabia Licinia. Forlani and Lafreri were also publishers and dealers of maps, and judging from the expressions "apud" or "ex aeneis formis" we may even be permitted to consider as such Ioannes Franciscus Camotius, Michael Tramezini, Claudius Duchetus, Vincentius Luchini, and Bologninus Zalterius."

"The maps are all printed from copper-engravings, and many, from this point of view, are real masterpieces. Several of them, especially maps of the Mediterranean countries, were copied by Ortelius." Nordenskiöld's *Facsimile-atlas*, p. 122.

"During the middle of the 16th century map printing reached a high development in Italy, especially in Venice. Lafreri's atlas is not the only instance of maps first published on detached leaves and afterwards collected and brought into the market with a common title-page. Such a collection, in oblong folio, was published about 1572 by Camocio with the title: *Isole famose*" . . . Nordenskiöld's *Facsimile-atlas*, p. 118.

Henrico Ranzovio Daniae prodvci, signed Rumoldus Mercator, dated 1595. 1 l. verso blank.—26 l. incl. 10 maps.—Index, followed by colophon, [8] pp.

Most of the maps have descriptive text on the reverse. Very imperfect copy of the third part of Mercator's atlas.

The title, *Atlantis pars altera* . . . was printed separately and pasted over the title upon the engraved title-page of the edition of Ptolemy of 1578.

Raemdonck doubts whether the map of America belongs to this edition. According to his description, the Planisphere and maps of Europe and America are wanting. Of the maps dedicated to queen Elizabeth, Iceland and seven of the nineteen of Scotland, Ireland and England are wanting.

Only parts of his atlas had been published up to the time of Mercator's death. The first part appeared in 1585 and contained the three sections: (1) *Galliæ tabulæ geographicæ* . . . (2) *Belgii inferioris geographicæ tabulæ* . . . (3) *Germaniæ tabulæ geographicæ* . . . The second part containing *Italiæ Sclavoniæ, et Græciæ tabulæ geographicæ* . . . was published in 1590. Rumoldus Mercator brought out the third part in 1595, a few months after his father's death.

Nordenskiöld in his *Facsimile-atlas*, gives a list of pseudo-editions of Ptolemy among them the edition of Stobnicza, Cracoviæ, 1512. This very important edition, though not properly a Ptolemy, is specially noted as containing a map of the world held to be the earliest map in which the north and south continents of the new world were joined, until the Waldseemüller map of 1507 was discovered. Consult Nordenskiöld's *Facsimile-atlas*.—Stevens' *Ptolemy's geography*.—Thacher's *The continent of America*.—Winsor's *A bibliography of Ptolemy's geography*.

The Library of Congress does not possess a Ptolemy manuscript but an interesting collection is owned by Mr. Edward E. Ayer of Chicago. This collection consists of the following manuscripts:

The New York Public Library has one manuscript of Ptolemy's geography which was purchased about fifteen years ago. It was probably written about the middle of the fifteenth century, and consists of the latin text by Donis with the twenty-six maps colored, the whole being on vellum.

The *Catalogue of the manuscript maps, charts, and plans . . . in the British Museum* . . . London, 1844, pages 3–8, describes the following:

Claudii Ptolemæi Pelusiensis geographiæ libri octo; Græce; tabulis geographicis, sive partibus earum septuaginta octo illustrati. Codex membranaceus, eximie pulchritudinis, et formæ amplioris in folio. Continet Ptolemæi Geographiam Latine redditam a Jacobo Angelo, et Alexandro V. Pontifici Max. dicatam. Scriptus ergo est Codex, A. D. 1409, quo anno unico Alex. ille Papatum tenuit. Ornatur mappis geographicis pictis, et literis initialibus coloratis.

Cl. Ptolemæi Geographia, Latine reddita per Jacobum Angelum. Codex membranaceus, grandis, seculi decimi quinti, colorum splendore multo inferior codici

eiusdem generis supra memorato ad num. 7182, eleganter tamen scriptus. Desunt pauca.

Claud. Ptolemæ Geographia, 8 libris. A. Jacobo Angelo traducta . . . Codex chartaceus xv.

Raidel, in his *Commentario critico-literaria de Clavdii Ptolemaei geographia . . . Norimbergæ, 1737*, notes page 26, "De splendissimo codice latino Ebneriano."

J. Pierpont Morgan owns a rare copy of Ptolemy's geography which has been erroneously described as a manuscript. It is a beautiful copy with colored plates and was bound for Mary, queen of Scots. This is probably the copy described by George F. Barwick as, *A book bound for Mary, queen of Scots . . . London, 1901. (Illustrated monographs issued by the Bibliographical society. no. 1x)*

Nouveau théâtre du monde ou nouvel atlas comprenant les tables et descriptions de toutes les régions de la terre . . . 3 v. fol. Amsterdam, J. Jansson, 1639-1640. 3422

NOTE.—Wanting signature oo, *La républiq de Genne; partie occidentale.* Titles of v. 2-3 read: *Nouveau théâtre du monde ou nouvel atlas; v. 3, Editio ultima.* An atlas which corresponds with this, was published at Amsterdam by Henricus Hondius in 1639. Jansson was a brother-in-law of Henricus Hondius and associated with him in business. When Hondius died in 1638, Jansson carried on the work, which accounts for the difference in publishers. Date on v. 1, changed with a pen from 1639 to 1640; v. 2-3, dated 1640. Dates on maps vary from 1624-1634. The name of Hondius does not appear on the title-pages, but the preface to v. 1 is signed: *Henry Hondius et Jean Jansson.* Title pages engraved and colored.

Contains one map of Russia by Isaac Massa. Map of the universe by Henricus Hondius, ornamented with portraits of Caesar, Ptolemy, Mercator and Hondius. For various notes on the editions of Jansson's atlas, consult v. 1. NOTE.—Bk. 1, title, [2] pp. fold. fac simile, [2] 30 pp., 27 (i. e. 30) pl.; bk. 2, 24 pp., 15 maps, 12 (i. e. 14) 1 pl.; bk. 3, 25 pp., 8 pl.; bk. 4, 12 pp., 17 pl.; bk. 5, 26 pp., 117 (i. e. 144) pl. Wanting v. 2.

The title-page is ornamented with a surveying instrument with a ring at the top. The British Museum has two copies of this date, which for convenience in comparison are here called copies A and B, while the Library of Congress copy is called copy C.

The title-page of copy B corresponds with that of copy C as given above. The title-page of copy A differs slightly, the dedication reads, *Alla serenissima e gloriosissima Repubblica di Venetia*, and there is no ornament.

The second leaf in copy A reads, *Serenissimo e gloriosissimo Principe*. Signed Antonfrancesco Luccini. The page is full size, verso blank, initial letter E, five lines of text with ornamental head piece. This page is not found in copies B and C. Instead these copies have a leaf, 1. 4 in copy B, and 1. 2 in copy C, which is not found in copy A. This page reads, *Avvertimento ai lettori, e librai*, initial letter L, 11 lines of text full width of page, followed by contents to all the six books of the work, in two columns which continue half way down the verso of the leaf, signature S, and catchword 24Le. Leaves 2 and 3 in copy B, and 3 and 4 in copy C contain the patent of Ferdinando II, grand duke of Tuscany, confirming Dudley in the use of the title, duke of Northumberland, dated 1620. In copy A, this plate is bound with the plates of bks. 2-5 in a separate volume.

Leaf 5 in copies B and C, is the *Indice generale del tomo primo*, with the initial letter S nine lines deep, text in two columns on both sides of the leaf. The first reference is pagina 6, figura 1, the rest have prefix p. i. e. p. 9, fig. 3; the catchword is Del. On the verso of the leaf is an elaborate tail piece and catchword Del.

This index appears in copy A on l. 3, the initial letter S is here only five lines deep, the first reference is Dichiaratione 6, figura 1, the rest have prefix d. i. e. d. 9, fig. 3, catchword Del., and end on the verso of the leaf with the words *Il Fine*, no tail piece and no catchword.

Leaf 4 in copy A, is the *Indice generale del tomo secondo*. Initial letter C, six lines deep, text in two columns, catchword disesi, verso of the leaf ends with the words, *Il Fine*, and a tail piece.

This leaf occurs in copy B, following the title-page to v. 2; on it the initial letter C is five lines deep with a blank space two lines below, text ends with catchword Car-; on the verso of the leaf the words *Il Fine* are omitted, and the tail piece is more elaborate than in copy A. This page does not occur in copy C.

In copies B and C, the text of bk. 1, pp. 1-30, follows p. 5, then the plates of bk. 1, then the text of bk. 2, followed by the plates of bk. 2, etc., through bk. 5, which is the end of copy C.

In copy A, the text follows continuously i. e. bk. 1, pp. 1-30; bk. 2, pp. 1-24; bk. 3, pp. 1-25; bk. 4, pp. 1-12; bk. 5, pp. 1-26; bk. 6, pp. 1-41. The plates are bound in separate volumes, those of bks. 1-5 in one volume, without title but with the patent prefixed, and plates of bk. 6, with the title-page of *Tomo secondo* prefixed.

Dudley, Sir R.—Continued.

The plates of bk. 1 are the same in all three copies except pl. no. 25. They are numbered 1-27, with the following additional plates, 2. il. 2°, 6. il. 2°, 6. il. 3°, and 13. la. 2°. Plates nos. 9 and 27 are duplicates, carrying both numbers. In copy A, pl. no. 25, bears the number 25, and has in lower right hand corner *ÆLucini fecit*, letter H at bottom in center, below scale number 5000 and the words *Sini Retti* in the bottom scale between the numbers 3000 and 4000, and 4000 and 5000. In copies B and C, there is a different plate of the same design. It bears number 146. il. 3°, 24. A figure 5 is written over the 4 of 24 with a pen. No engraver's name, letter H, or words *Sini Retti*, appear. The plates of bk. 2, in copies A and C are the same except for the order which is described above. There are 28 plates, 15 of which are maps and two additional plates marked, 7. il. 2, and 8°. la. 2. Among these plates the one which is marked 6 in the 1646-47 edition is here marked 8, though in its proper order as no. 6.

In copy B, the regular plates nos. 8 and 8. la. 2. are lacking. The plates to bk. 3, are the same in all three copies, being nos. 1-6, 6. il. 2°, 7.

The plates to bk. 4, are the same except that in copy C they do not run straight from 1-17, but are bound in the following order, 1-3, 17, 15, 16, 4-14.

The plates to bk. 5, consist of nos. 1-117, with the following additional plates, 27. il. 2°, 83. il. 2°, 34. il. 2°, 44. il. 2°, 49. il. 2°, 49. il. 3°, 78. il. 2°, 84. il. 2°, 115. il. 2°. Plate no. 10 has 8 leaves and no. 13 has 12 leaves. These are the same in all three copies except that in copies A and C nos. 57 and 77 are upside down, and in copy B many are not cut out.

At this point, copy C, the Library of Congress copy, ends.

In the British Museum copy A, the plates of bk. 6 form what is usually the second volume, though in this case the plates to bks. 1-5, are bound separately in a volume, thus making three volumes to the set, as mentioned above. This volume contains the plates of bk. 6, and has title-page which reads, *Arcano del mare . . . Tomo secondo . . . Impressione seconda*, the dedication and imprint being the same as v. 1, with no ornament.

In copy B, the title-page has the same wording as in copy A, v. 2, but the dedication and imprint is same as on copy B, v. 1. There is an ornament but it differs from the one on copy B, v. 1.

As noted above, the *Indice generale del tomo secondo*, in copy A is bound as l. 4 of v. 1. In copy B, this index follows the title-page in v. 2, then the text of bk. 6, followed by the maps as follows, Europe, 54; extras, 4; Africa, 17; Asia, 23; America, 33; making 131 maps in all. They seem to be the same impressions as in the 1646-1647 edition but all but about twenty-four of them have the cypher L. 6°. added in the title cartouche.

The maps in copy A are the same as in the other copies. The plates in the Library of Congress copy of the 1661 edition are the same as those in the L. C. copy of the 1646-1647 edition, except that the 1661 edition contains the following plates, which are omitted from the 1646-1647 edition: bk. 1, 13. la. 2°; bk. 4, small cross section of boat which appears on no. 17; and bk. 4, no. 5.

For extensive note on the first edition, consult v. 1, title 457.

David Clément in his *Bibliothèque curieuse . . . 1757, v. 7., pp. 459-463*, gives the title of the 1646 edition, which he calls *Première édition fort-rare*, and describes the 1661 edition in detail.

"Il faut que l'on n'ait pas tiré pas beaucoup de copies de la première édition, puisqu'on a été obligé de remettre cet ouvrage sous la presse en 1661.

"On en trouvera un exemplaire dans notre Bibliothèque roiale, qui est relié en deux volumes de grandeur d'Atlas, dont le premier est intitulé:

"*Arcano del Mare di D. Ruberto Dudleo duca di Nortumbria, e conte di Warwick. Diviso in libri sei. Nel primo, de' quali tratta della longitudine praticabile in diversi modi, d'invenzione dell' autore. Nel secondo, delle carte sue generali, e de' portolani rettificati in longitudine. Nel terzo, della disciplina sua marittima, e militare. Nel quarto, dell' architettura sua nautica di vascelli da guerra. Nel quinto, della navigazione scientifica, e perfetta, cioè spirale, di gran circoli. Nel sesto, delle carte sue geografiche, e particolari. Impressione seconda, corretta, & accresciuta, secondo l'originale del medesimo eccellentissimo signor duca, che si conserva nella libreria del convento di Firenze della pace, de' Monaci di S. Bernardo del ordine Fuldense. Con l'indice generale di tutta l'opra, e de' capitoli, e delle figure, & istruzione a' librai per legarle. Alla serenissima, e gloriosissima Repubblica di Venetia. In Fiorenza, MDC.LXI (1661) Nella nuova Stamperia, per Giuseppe Cocchini, all' insegna della stella. Ad Istanza di Jacopo Bagnoni, & Antonfrancesco Lucini. Con Licenza de Superiori."*

"Antonfrancesco Lucini a mis une dédicace à la tête de cette édition, dans laquelle il parle de l'auteur & de soi-même, en ces termes:

"Il S. Duca di Nortumbria, . . . consummò ben quarant' anni di sua vita in disuolare à prò dell' humana repubblica, il presente Arcano del Mare, che io da poi sequestrato per dodec' anni da tutto il rimanente del Mondo, in vn picciolo vilaggio della Toscana cola sponda di Prencipe grandissimo, in non meno che cinquemilla libre di rame hò intagliato per farlo publico cola stampa."

"Après cetto Dédicace vient la Table générale des figures du Tome I. qui est suivie d'un Avertissement, dont je donnerai ici le commencement:

"La stima grande, e l'esito pronto di questa presente Opera ci anno stimolato a farne la seconda Edizione. Alcune imperfezioni, e difficoltà, che s'incontravano nella prima ci anno consigliato à correggerla, ed ampliarla. In primo luogo il manuscritto dell' Autore ha somministrato molte giunte, correzioni, e Figure. Nel secondo considerando la deformità; e l'incomodo risultante dalle varietà delle forme, e dalle piegature delle carte intagliate abbiamo ridotta quest' Opera tutta d'una grandezza, e quella amplissima."

"Enfin vient le discours préliminaire de l'auteur, & le premier livre, qui occupent 30. pages d'impression, & 27. planches gravées en cuivre. Le livre est suivi de l'édit de l'Empereur Ferdinand II. daté de Vienne le 9. Mai 1620, & gravé en cuivre d'après l'original, par lequel Robert Dudley est déclaré publiquement duc de Northumberland, pour lui & les aînés qui descendront de lui en droite ligne.

"Le livre second remplit 24. pages, & est orné de 23. planches. Le Livre III. Pagg. 25. Planches 6. Le livre IV. Pagg. 12. Planches 14. Le livre V. Pagg. 26. Planches 89. Ainsi finit le premier volume.

"Le tome II. porte le titre suivant: "*Arcano del Mare di D. Ruberto Dudleo duca di Nortumbria, e conte di Warwick. NOTE.—The first complete edition of Blaeu's atlas, in 11 v. appeared in 1662. A second edition of the first volume appeared in 1665, all other volumes of the

set being dated 1662. This set is of the latter edition. In 1663, a french edition in 12 v. was brought out and a second edition of it in 1667. The french edition is mainly like the latin edition of 1662 except in the enlargement of the text on several countries, the text on France and Switzerland being enlarged to fill two volumes instead of one as in the 1662 edition. Both editions contain the same maps with one or two exceptions.

In v. 6, the map entitled, *Fifas vicecomitatus*, has been duplicated evidently in place of a map entitled, *Fifas pars orientalis*, which has been omitted.

1666?**Visscher, N.**

Atlas contractus orbis terrarum præcipuas ac novissimas complectens tabulas. 1 p. l., 60 (i. e. 56) maps. fol. Amstelædami, ex officina N. Visscher [1666?] 3431

NOTE.—Written at the foot of the title-page are the words: “*Bought att Amsterdam Saturday 23^o Septemb. 1676. Præbium 9 rix dollars (i. e.) 45/8. Anto. Fletcher.*”

The name and initials of Anto. Fletcher are written on map no. 1 and 2 respectively.

Index headed, *Index et ordo tabularum*, is written on last leaf in handwriting different from that of note on the title-page.

There is much confusion concerning the Visschers. F. A. K. Jolig, in a monograph published in 1903, gives the date of birth and death of the Visschers as a result of his investigations in regard to them. Claes (or Nikolaas) J. Visscher, 1587–1637; Nikolaas, 1618–1679; Nikolaas, 1649–1709. It seems probable that Nikolaas, 1618–1679, was responsible for the publication of this atlas. He must also have used the name Nikolaas J. Visscher as there are maps later than 1637 by Nikolaas J. Visscher, such as *Ducatus Brunsvicensis fereque Lunæburgensis . . . 1650*, and the *Novum Belgium* containing the noted view of New Amsterdam. Tiele gives an *Atlas contractus* with an *Index et ordo tabularum* and 91 maps dated from 1660–80. Some of the maps are by Cl. Jz. Visscher and some by Jansson, though most of them are by Nikolaas Visscher. It contains the map *Novi Belgii novæque Angliæ nec non partis Virginie tabula multis in locis emendata a Nicolao Joannis Visschero*, with the view of *Nieuw Amsterdam opt eylant Manhattans*, though whether the Nikolaas J. Visscher or the later Nikolaas Visscher map, Tiele does not state.

The Library of Congress copy of the atlas contains 56 maps only three of which are dated, no. 7, 1656; no. 13, 1650; no. 52, 1659.

From the written date of purchase on the title-page, it is certain that the atlas was issued before 1676. The date 1666? seems a probable one as many of the map makers and engravers were contemporaries of that period, though some of the maps were undoubtedly issued much earlier.

The written index calls for 60 maps; of these the following are wanting: *Russia.—Palatinus Rheni.—Marchionatus S. R. Imperii.—Græcia.—Candia.*

This atlas contains the rare N. J. Visscher edition of the map, *Novi Belgii novæque Angliæ nec non partis Virginie tabula multis in locis emendata a Nicolao Joannis Visschero*. This is considered to be the second known view

of New York. It is supposed to have appeared between 1651, the date of the first known view, and 1656, as the map of van der Donck, which many consider to be a copy of this, appeared in the latter year. It is also contended by some that this view was taken from a sketch by Augustine Herrman. Consult Asher's *A list of maps and charts of New-Netherland*; and Andrews' *New Amsterdam, New Orange, New York*. John Romeyn Brodhead, in his *History of the state of New York*, speaks of a copy of the J. N. Visscher map as attached to the documents of 1656 concerning New Netherland, in the royal archives at the Hague.

NOTE.—This collection of english maps by William Berry is sometimes known as the english Sanson atlas. The maps were published separately at various dates, and the atlas was issued without title-page.

There are only two other copies of this atlas known, one in the possession of Henry Stevens, son & Stiles, and the other in the king's collection in the British Museum, where it is regarded as one of the rarest of english atlases. Contains five maps of Ireland by sir William Petty.

Dates on maps vary from 1680–1689.

The maps of the world, Europe, Asia, Africa, North America, South America, Spain and Italy are each accompanied by geographical tables of the divisions on 11., dated 1680.

A list of 33 maps headed, *There are these mapps published, all in two large sheets by William Berry*, appears at the foot of map no. [32] *The circle and electorat of the Rhine. . . . 1689.*

Many of the dates on the maps are supplied from the *Term catalogue*.

NOTE.—A collection of maps in 2 v. issued by the van Keulen firm, Joannes van Keulen I, Gerard van Keulen and Joannes van Keulen II. In an article relating to the life of Richard Holmes Laurie, which appears in *The Gentleman's magazine of May, 1858*, the van Keulen firm is spoken of as the oldest existing firm in Europe which had devoted itself to nautical works, the firm having then been in existence for over two hundred years; and that prior to the commencement of the 18th century the english were almost entirely dependent on the dutch for the charts and directions by which their ships were navigated. Their great and little sea torches as well as the *flambeaux de la mer*, of the french, were copied from van Keulen's great work.

The only maps in the collection which carry dates are:

NOTE.—J. Cóvens and C. Mortier brought out many editions of this atlas about 1730 and later, in 3, 4 and 5 volumes, with the title *Atlas du monde* or *Atlas nouveau*. This edition is the largest, consisting of 9 v. Some of the earliest of the maps were published by Pieter Mortier. Consult Tiele's *Nederlandsche bibliographie van land- en volkenkunde*. Vol. 9, contains the maps of America.

J. Cóvens and C. Mortier, published atlases by Allard, de Wit, Delisle, Jaillot and Sanson. There are many maps by these cartographers contained in this atlas, as well as many by others.

Vol. 1, contains the general title-page printed in red and black, preceded by the engraved, colored title-page of Sanson's *Atlas nouveau*, which reads: *Atlas nouveau contenant toutes les parties du monde, où sont exactement remarqués les empires, monarchies, royaumes, estats, républiques & peuples qui sy trouvent à present. Par le sr Sanson . . . Présenté à monseigneur le dauphin. Par son très-humble, très-obéissant, et très-fidèle, serviteur, Hubert Jaillot . . .* Over the lower part of the title, covering the names of Sanson and Jaillot, a slip of paper has been pasted on which has been written: *Le tout recueilli par les meilleurs géographes.*

The title-page is followed by an elaborately illustrated index sheet entitled: *Table des cartes etc. de I. Cóvens et C. Mortier . . .* The center of the sheet is left blank for the list of maps. In all volumes except v. 1, a paper on which the list of maps has been written, is pasted over this blank space.

Vol. 1, contains the *Inleidinge tot de geographie . . . Door den heer Sanson d'Abbeville . . .*

This introduction was used in works by Sanson as early as 1681.

The following note is written on the general title-page of v. 1: "Cet ouvrage a été acquis par moi soussigné notaire à Gand en vente publique tenue par moi à la mortuaire des époux Montobio à Gand ce x^{bre} 1800, souantedeux. J. J. J. Ghesquière."

In v. 3, 7, the engraved colored half-title is signed R. de Hooghe, and reads: *Atlas novum.—Atlas nouveau contenant toutes les parties du monde &c. à Amsterdam, chez Jean Cövens et Corneille Mortier.*

The title-page of Allard's *Atlas Minor*, with a slip pasted over Allard's name precedes the general title in v. 4 and 8, with a slip pasted over the word *minor* in v. 8, making it read *Maior*.

In v. 5, the title-page of Sanson appears showing evidences that a slip has been pasted over the names of Sanson and Jaillot, but has been torn away.

The vignettes on the general title-pages of v. 1-3, are signed *J. Wandelaar del et fecit*: and those on the general title-pages of v. 4, 6, and 8 are signed *B. Picart idv. 1728*.

The table of contents shows that the atlas contains many views of cities all of which are engraved and colored, also that there are many interesting maps of America in v. 9, among which are those of Henry Popple and John Mitchell. The Mitchell map differs from other impressions of the same map, in containing three insets and in the omission of certain text.

The first eight volumes of this set were purchased by the Editor in London from messrs. Stevens, Son & Stiles. Later he found and purchased the ninth volume from Martinus Nijhoff at the Hague.

The earliest date, 1683, is found in v. 9, map no. 25, *Jobi Ludolfi, Habessina seu Abassia*. The latest date, 1761, is found in v. 4, map no. 46, *Kaart van de graafschappen Buuren en Culenburch . . . door mr Jacob Perrenot*.

By John Thornton, hydrographer at the signe of England, Scotland, and Ireland in the Minories. 1 p. l., 10 pp. [23], [2] maps. fol. London, J. Thornton [1700?] 3455

NOTE.—This copy containing 23 maps is evidently in original condition. The two maps added were taken from a second, imperfect copy belonging to Henry N. Stevens, who has compared the present copy with the British Museum copy, which, he states has 28 maps but does not contain *England, Zeloan, Mediterranean sea, or sea-coasts of Barbary*. Two of these are in the present copy, the other two are added. "On the other hand the British Museum copy has several maps not in either of the Henry Stevens copies, but some of the British Museum are clearly later, one being dated 1702. From the evidence of these three specimens it is clear that the contents of copies varied as issued from time to time. Even the printed text exists in three separate impressions."—H. N. S.

A map of the world surmounts the engraved title. Maps mounted on grey paper. Maps no. 1, 8, 9, 12, signed *Ia. Clark sculp.*, and *Ia. Clerk sculp.* In 1807, Dalrymple reprinted *The nature and properties of the winds and moussons in the navigation from England to East Indies . . . by John Sellers . . . London, 1675*. In the Advertisement attached to this reprint Dalrymple says: "The work of John Seller, from which This Account of the Winds was taken, is entitled '*The English Pilot. The 3d Book. Describing the Seacoasts, Capes, Headlands, Straits, Soundings, Sands, Shoals, Rocks and Dangers—The*

Islands, Bays, Road Harbours and Ports in the Oriental Navigation. It is *very rare*, for I have never seen but *two Copies*, both in my own possession; but *both imperfect* . . . I have collated *John Thornton*, 1703, who has copied *Seller*, almost *verbatim*, even to the *Title Page*, inserting *his own name* instead of *Seiler*, without the slightest notice of having copied *Seller* . . . A more bare-faced *Plagiarism* I have not seen."

Loots, J.

[Atlas] 14 maps. fol. [Amstelodami, I. Loots, 1705?] 3464

NOTE.—Atlas without title-page.

Tiele gives the following concerning the Loots atlases: “*Atlas. Amst., ex off. Joh. Lootz (sic) (c. 1700?)* fol. Gegrav. titel van J. Harrewijn met jaartal 1685 doch waarschijnlijk voor vroegere atlassen gebruikt; Korte verklaring van de weereld, 4 blz. Zeekaarten van verschillende groote, ten getale van 31 en 1 blad opdoeningen van zee-kusten. Een blad is van C. J. Vooght . . . en twee van Cl. de Vries. Alle op een na hebben 't adres van Joh. Loots.—*Bierens de Haan, Bibliogr. Neerland.* p. 173, vermeldt: Zee-atlas. Amst., Joh. Loots, 1685 (iv) pp. en 33 kaarten, denkelijk dezelfde als de vorige; voorts: Het nieu en compleet Paskaert-Boeck van de Noord en Oost-zee. Ald. 1697. (iv) pp.

en 11 kaarten (?) en De Nieuwe groote Spiegel. Ald. 1719. 3 dln. fol. (?? Denkelijk Lootsman's Zeespiegel)"

Both of the Claas de Vries maps and the one by C. J. Vooght, referred to by Tiele, are in this atlas.

The only map in the atlas containing a date is map no. 6, *A new and correct draught of the channel between England and France*. It has the title in dutch and french as well as english and contains the following note: *Shewing the sands, shoales, depth of water and anchorage on the said coasts with the setting of the tydes and the time of high water as observed by capt Edm. Halley by his majties commd in the year 1701.*

This map and a similar map with the same title and note, dated 1714, in the *English pilot, part 1, 1718*, are evidently based on a map with the same title in the *Atlas maritimus novus*, of Richard Mount and Thomas Page, 1702.

1709-1736**Moll, H.**

The world described; or, a new and correct sett of maps: shewing the several empires, kingdoms, republics . . . in all the known parts of the earth . . . Each map is engraved on copper by Herman Moll, and printed in two sheets of elephant paper . . . 1 p. l., 30 fol. maps. fol. [London] J. Bowles [1709-1736] 3469

NOTE.—A collection of Moll's maps, some published with dates and others without. The earliest, that of Rome, was published in 1709; no. 8: *A new and exact map of the dominions of the king of Great Britain* . . . having been issued after 1735. In regard to this map, H. N. Stevens, London, says as follows: "I know of 4 states of this map. The first and second issues of this map are very rare, especially the first. The first has the imprint of H. Moll alone with his address. The second has Moll's name with address deleted and name & address of I. King added. The map in this state also has the Cherokee note ['Cherocias 3000 men, one of y^e Kings &c, of this nation was in England in 1730'] & the Carolina parishes, and was probably issued soon after Moll's death in 1732. The 3^d state, Moll's name is deleted altogether from the imprint & the two Bowles' names & addresses put before King's.—In the 4th state John Bowles is altered to John Bowles & son."—The original 1715 Moll British Dominion . . . has not the Cherokee note and the Carolina parishes."

The map in this atlas answers the description of the 4th issue.

Amstelædami, ex officina N. Visscher [1712?] 3473

NOTE.—The date 1712 has been assigned to this atlas, as there are three maps by the widow of Nikolaas Visscher. Visscher died in 1709 and his widow carried on the business, so 1712 seems a probable date for the publication of this edition. None of the maps are dated.

Beside those by Visscher and his widow, there are maps by Schenk, de Wit, Schotanus à Sterringa, Sanson, Delisle and Blaeu. Several maps have indexes on the reverse. The title-page has been mutilated and repaired. There is a manuscript index calling for 73 maps, three having evidently been inserted at a later date, making the 76 maps.

Contains colored engraved half title which reads: *Atlas minor sive totius orbis terrarum contracta delineata [!] ex conatibus Nico Visscher Amat. Bat. Ger. de Laïresse delin. & sculp.*

Forty-two new maps of Asia, Africa, and America . . . All engrav'd, according to the latest observations, by Herman Moll, geographer. 2 p. l., 43 col. maps on 82 l. 8°. London, J. Nicholson, 1716. 3477

A new sett of maps both of antient [!] and present geography, wherein not only the latitude and longitude of many places are corrected, according to the latest observations; but also the most remarkable differences of antient and present geography may be quickly discern'd by a bare inspection or comparing of correspondent maps; which seems to be the most natural method to lead young students (for whose use the work is principally intended) unto a competent knowledge of the geographical science. Together with a geographical treatise particularly adapted to the use and design of these maps . . . Imprimatur, Gu. Paynter. 1 p. l., 41 maps. fol. London, W. Churchill, 1718. 3479

NOTE.—The first edition of this atlas appeared in 1700, and was reprinted in 1701. According to the *Term catalogue, 1668-1709*, a second edition was pub-

lished in 1707 and a "second impression" in 1708. The fourth edition is dated 1726. The maps are engraved by M. Burghers, R. Spofforth, Sutton Nicholls, Ed. Smith, Benj. Cole and J. Moxon. *A geographical treatise*, called for by the title-page, is wanting. The Library of Congress has the 4th edition of the *Treatise of antient and present geography*, London, 1726. Aa, P. van der.

Divisée en LXVI. tomes. Les estampes aiant été dessinées sur les lieux, & gravées exactement par . . . Luyken, Mulder, Goeree, Baptist, Stopendaal, & par d'autres maîtres renommez, avec une courte description qui précède chaque empire, royaume &c. & même avec le sommaire sous chaque planche . . . Le tout mis en ordre & exécuté à Leide, par Pierre van der Aa [1729] 3485

NOTE.—66 v. in 27. plates (partly fold.) maps (partly fold.) fol.

100 copies printed. T.-p. in red and black; title vignette. *Table générale de l'ordre des feuilles et figures des lxvi tomes: t. 1, p. [7]—37.*

Each section has also special table.

The actual date of this publication is found in van der Aa's *Bibliotheca selectissima. Leyden, 1729. v. 2, p. 379*. Although this collection contains a large number of miscellaneous views of buildings, &c., only the maps, plans, and views of cities and towns are described in the contents. Arbitrary volume numbers used for convenience in indexing.

"This stupendous publication contains above 3000 plates and maps, many by the best dutch engravers, as Luiken, Mulder, Goeree, Stoopendaal, etc. Most of these plates have served before for the splendid publications of P. v. d. Aa and others in Holland, and are here reproduced mostly with broad borders, and with some new plates. The publisher says in the preface to the 1st volume that he has bought nearly all plates from various dutch publishers as: Blaeu, Viischer, de Wit, Meurs, Halma, Mortier, Allard, etc., and adds: 'Je n'ai imprimé que 100 exempl. de cette Galerie du monde et soyez assuré que je ne remettrai sous la presse un ouvrage si pénible sur quoi je garderai ma parole en homme d'honneur.'—The work is very rare; I have never seen or heard of any complete copy before, nor do I know of any one existing (besides that in the Royal Library of the Hague) It was called already 'Très-rare' a century ago in the Catalogue of the library of Dankert d'Assenfeldt, which was sold in the Hague in 1792, and where the following note was added to the title: 'Ouvrage curieux dont il n'y a imprimé que 100 exempl., déjà devenu très-rare'.—In Ferwerda's Catalogue universelle avec les prix, Leeuw, 1774, it is called: 'Ouvrage curieux dont il n'y a d'exemplaires de reste à trouver que dans de grandes bibliothèques; vendu, vente Gritti 1769, flor. 160.—v. Dalen, 1772, flor. 105.'"

"The work may justly be called a 'Univers illustré' by far surpassing all similar publications down to our time. Didot's *Univers pittoresque* can not stand a comparison with it. It is arranged according to the various countries; the first volume contains a detailed index (37 pages) of the plates of all the parts, each volume being besides accompanied by a short geograph. and histor. description and a list of its plates. The whole is divided as follows:

"Europe: 47 volumes	} 66 vols.
"Asia: 12 volumes	
"Africa: 3 volumes	
"America: 4 volumes	

"America: Nouv. Espagne, Yucatan, Guatimala, Florida, Virginia, New-England, Canada, Terra Firma, New Granada and Popayan, Venezuela, Guiana,

Peru, Brazil, Paraguay, Chili, Magellanica, Bermuda, American islands. With above 240 plates and maps. In order to give an idea of the variety of the subjects of the plates it may suffice to mention the last 5 plates of the last volume:

"Costumes and cottages of the inhabitants of New Albion.

"How the inhabitants of N.-Albion honour strangers.

"Chev. Drake gifted by the king with the island of New Albion.

"Battle between the spaniards and indians in California.

"Savages of the Detroit of Frobisher.

"According to the Catalogue of the books of P. v. d. Aa (sold in 1729) p. 379, no. 1175, this work is published in 1729". Consult Muller's *Catalogue of books, maps, plates on America, and of a remarkable collection of early voyages. Amsterdam, Frederik Muller, 1872. pt. 1. pp. 1-2.*

Wells, E.

A new sett of maps both of antient[!] and present geography, wherein not only the latitude and longitude of many places are corrected, according to the latest observations; but also the most remarkable differences of antient and present geography may be quickly discern'd by a bare inspection or comparing of correspondent maps; which seems to be the most natural and easy method to lead young students (for whose use the work is principally intended) unto a competent knowledge of geographical science. Together with A geographical treatise particularly adapted to the use and design of these maps. By Edward Wells, d. d. some time student of Christ-Church, Oxon, and late rector of Cotesbach in Leicestershire. Imprimatur, Gu. Paynter . . . 2 p. l., 41 (i. e.,

- 38) maps. fol. London, printed by T. W. for J. Walthoe, R. Wilkins [*etc.* 1738?] 3489

NOTE.—The first edition of this work appeared in 1700, and was reprinted in 1701. According to the *Term catalogue, 1668-1709*, a second edition was published in 1707 and a "second impression" in 1708. The fourth edition is dated 1726, and the fifth edition, 1738.

The date 1738 has been assigned to this atlas as Wells appears on the title-page as the late rector of Cotesbach, which rectorship with that of Bletchley in Buckinghamshire, he held until his death. He died in 1727, and the only edition noted as appearing after that date is that of 1738.

The maps are engraved by M. Burghers, R. Spofforth, Sutton Nicholls, Ed. Smith, Benj. Cole, and J. Moxon. *A geographical treatise*, to accompany this atlas is wanting.

The following maps are wanting:

no. 33. *Travels of the patriarchs and children of Israel, &c.*

" 34. *Land of Canaan, &c.*

" 35. *Places in the New Testament.*

For editions of 1700 and 1722 consult v. 1, titles 531, 564.

NOTE.—Engraved title-page, *Jacob Christoph Wejerman inv. et delin. Martin Gottfrid Crophius sculp.*

This atlas is the same as Matthew Seutter's *Atlas minor*, in title-page, text and maps, with the exception of the fact that Lotter's *Atlas minor* contains 11 more maps than Seutter's, and the substitution of Lotter's name for Seutter's on map no. 29, *Imperium Romano-Germanicum*.

The additional maps are as follows, in the order in which they are placed in the atlas:

- no. 71. Nova mappa geograph: totius ducatus Silesiæ . . . sumptibus et cura Tob. Conr. Lotter.
- " 72. Princip. Vratislaviensis . . . Sumptibus et studio T. C. Lotter.

 " 81. Inset: Carte von Deutschland . . . verfertiget von Tob. Conrad Lotter.

Another copy of this atlas in the Yudin collection in the Library of Congress, is a duplicate of the one here described except that in the Yudin copy the map *Silesiæ ducatus* . . . per Matth. Seutter . . . is replaced by *Nova mappa geograph: totius ducatus Silesiæ* . . . Sumptibus et cura Tob. Conr. Lotter. Date assigned to the atlas is the latest date in the atlas, found in the text under the heading *Germania*.

Beside those of Lotter, many maps were made by Matthew and Albert Carl Seutter.

The engraving of the maps was done by And. Silbereisen, Matthæus Petter Lämpacher, A. C. Seutter, and by various members of the Lotter family: Tobias Conradus, Geog Friederich, Gustav Conrad and Andreas Lotter.

The following maps relate to America:

NOTE.—Edited by A. Gonzalez de Barcia Carballido y Zufigo; quoted as the 2d edition by some bibliographers, as the 3d by others who quote the Antwerp edition of 1728 as the 2d.

Engraved title-pages, each with the royal coat of arms of Spain, portraits of the discoverers and conquistadores, and pictures (copied from the t.-p. of the original edition) representing events during the discovery and conquest of Spanish America or customs of its inhabitants. Each decade has an engraved headpiece. The t.-p. of the various copies of this edition differ in date, some being dated 1725, 1726, 1728, or most commonly 1730, although the last decade was printed in 1728. The present copy agrees with the large-paper copy, described by *Medina, Bibl. hisp. amer.*, t. iv, although its paper measures only 29.1 x 20^m. The dates of the 1st, 4th, 6th, 7th, and 8th decades have been altered in this copy from 1726 to 1730, that of the 5th from 1727 to 1728. The *Descripcion de las Indias Occidentales* is placed in front of the first decade. It is accompanied by 14 maps, engr. on copper.

Clark, M.

[Charts of the coast of America from Cape Breton to the entrance of the gulf of Mexico] 1 p.l., 18 maps. fol. [Boston, M. Clark, 1790] 3667

NOTE.—No title-page.

The maps carry the following engraved inscription, signed in manuscript by Osgood Carleton: "Being recommended by the Boston marine society for the purpose of examining m^r Clarks charts I have carefully examined and compared this with Des Barres Hollands & other good authorities & find it an accurate chart of the coast &c. it contains."

On the preliminary leaf, part of the certificate reads: "Although these charts are sold singly to some, and for that reason, a certificate of the examination is engraven on each plate; yet as the whole are bound together in this book, and have passed the same inspection, it is presumed, that signing this will be satisfactory

without putting my name to each particular chart; — — — Teacher of mathematics in Boston. N. B. Those sold in separate sheets, will be signed as above." A space before "*Teacher of mathematics*" etc. left for the name, Osgood Carleton, in this case is blank, which together with the fact that the maps are signed shows that this atlas is not one of the original books but was collected and bound together at a later date.

The order of the charts is reversed beginning with no. 18 and ending with no. 1. The following is from the Boston Gazette, february 22, 1790:

"NEW SEA CHARTS.

Proposals for Publishing by Subscription,

A Complete set of Charts of the Coast of America, extending from Cape Breton on the East, into the Gulph of Mexico, with Nautical Directions, in which will be exhibited the most remarkable head lands upon the Coast. The whole to be accurately protracted from the latest surveys of Holland and Debarr, drawn on a large scale and convenient runs—To which will be added, printed directions for sailing the Coasts and entering the harbor.

Conditions.

- i. This work will be handsomely engraved and printed on superfine double crown American paper.
 - ii. The whole will be comprized in 15 numbers (or sheets) at 2s. each. The overplus given gratis.
 - iii. Each number will be delivered weekly at the dwelling of the subscribers.
 - iv. Those who subscribe for to sell again, shall have large allowance.
- The above plan is intended to comprize one general Chart, but for convenience it will be divided into five parts, each part to be lined with blue and delivered at nine shillings. It is also calculated so as to be bound into a book, and will be delivered at thirty-six shillings.

To the Public.

When so many attempts are making toward the advancing the interests of the arts and manufactures of this Country—When the vast extent of sea coast on the American shores, and the numerous and dangerous rocks, shoals &c. are considered, the utility of such a work will be readily admitted—more especially when there are so few charts of this coast extant, and those drawn on an inconsiderable scale.

It is not the intention of the Publisher to impose a work of this kind on the public, until it has had the minutest inspection by Mr. Osgood Carleton, recommended by the Marine Society in Boston, and who is allowed to be competent to the business by the certificate following, viz.

At a meeting of the Boston Marine Society the 5th of January, 1790.—Voted, "That the Boston Marine Society do recommend Mr. Osgood Carleton, as a person of good character and well acquainted with the Mathematicks."

No Chart will be published without this Certificate signed by Mr. Carleton's own hand in Manuscript. Although it is not in the power of the wisest man in the best of causes to insure success, yet from the examinations which have been already had, and the respectable list which have been added to the subscriptions, the Editor flatters himself, that while he aims at Public utility the patronage of a generous Public will enable him to pursue it. Matthew Clark. Subscriptions are received at Mr. Brook's Insurance Offices; at Col. Colman's; at the Eastern Coffee House, and the principal Booksellers in Boston.

Clark, M.—Continued.

The above Charts may be had of Mr. Andrew Newell, Mathematical Instrument-Maker, State-street, and Mr. William Deblois, No. 2, Long-Wharf."

The following is found in the Boston Gazette, July 5, 1790:

Camocio, G. F.

Isole famose porti, fortezze, e terre maritime sottoposte alla ser.^{ma} sig.^{ria} di Venetia, ad altri principi christiani, et al sig.^{or} Turco, nouamēte poste in luce. eng. title, [79] maps, 1 pl. obl. 12°. In Venetia, alla libreria del segno di S. Marco [1574] 3975

NOTE.—Corrected from v. 1, title 2815. Maps no. 1-3, 49-51, 65, 67, wanting. The engraving at the top of the title-page represents attributes of war, cannon, shields, armor, drums, swords, etc.; at the left is Mars, at the right Neptune; at the foot are two smaller engravings, one representing a battle, the other a sea-fight, between these two are the initials N. B.

A collection of maps to illustrate the war between Turkey and Venice, 1570-73, comprising maps of the coasts and of the most important ports of Austria, Turkey, Greece, and of the principal islands of the Mediterranean sea; also of Italy, England, Ireland, Iceland.

Camocio, G. F.—Continued.

Map no. 38, a plan of the battle of Lepanto 1571; no. 66, a plan of Constantinople.

"During the middle of the 16th century map printing reached a high development in Italy, especially in Venice. Lafreri's atlas is not the only instance of maps first published on detached leaves and afterwards collected and brought into the market with a common title-page. Such a collection, in oblong folio, was published about 1572 by Camocio with the title: *Isole famose, porti, fortezze* . . . This collection contains 88 maps generally insignificant in a geographical respect, though often excellent as copper-engravings. An almost complete copy is preserved in the Royal Library at Stockholm." Consult Nordenskiöld's *Fac-simile atlas* p. 118 n.

"Non comprendono le Isole circonvicine a Venezia; ma quelle dell' Istria, Dalmazia, Albania ed altre già soggette luogo a questo libro, anzichè notario ove parlasi delle Isole vicine alla nostra Città. L'autor principale è Gianfrancesco Camozio che dedica il primo intaglio fatto fare da lui (rappresentante il golfo de Venezia) ad Andrea Gradenigo, a. 1571. Abbiamo detto principale, poichè veggiamo diverse maniere d'intaglio; e v'è il *Vero sito e contada di Modon* intagliato al num. 45 da Martino Rota da Sebenico e altre vedute intagliate da Domenico Zenoi, a. 1566-1568; e una col num. 87, e coll' anno 1565, ov' è scritto: *Paolo Furlani Veronese* intagliatore in Venezia all' *insegna della colona*. Cosicchè pare che il Camozio, che stava alla *libreria della Piramide*, sia l'assuntore, il raccoglitore degl' intagli altrui, non già incisore egli stesso. Notisi però che vi sono esemplari più o meno copiosi di intagli, sebbene sieno numerati. Dello Zenoi e del Rota si è già parlato dal Gori Gandellini e dal suo continuatore de Angelis; ma del Forlani o Furlani non è menzione in quei due illustri scrittori. Il qual Forlani ha: *Il Golfo di Venetia* carta intagliata in rame de *Paolo Forlani con ogni diligenza l'anno MDLXVIII* e da lui dedidata ai n. u. Piaro (così) Badoero e Autorio Diedo. Il disegnatore apparisce dalla dedicazione essere il dotto Gastaldo." Consult E. A. Cicogna's *Saggio di bibliografia Veneziana*. 1847. p. 709.

In 1584, Christopher Plantin published at his Leyden establishment, for Luc Janszoon Waghenaer, the first edition of his marine atlas. It was in dutch and contained 23 maps engraved on copper by Joannes a Doetecum, dated from 1580 to 1583. In 1585, a second edition was brought out with an additional volume, and in the following year another dutch edition with several added maps, was followed by this latin edition translated by Martin Everaerts of Bruges. It contains the 44 maps of the first edition, and one of those added to the 1585-1586 dutch edition, i. e., *Mappa fluminis dicti vulgo Beldt*.

The title-page is the one engraved on copper by Joannes a Doetecum for the original edition . . . The maps are colored and have descriptive text on the reverse.

The first of the diagrams included in the text, *Organum Vranicum*, has lost the volvelle.

There were many editions of this atlas in different languages, for a description of which consult Tiele's *Nederlandsche bibliographie van land-en volkenkunde*. The Library of Congress has a copy of the english edition translated by Anthony Ashley. See note to that edition, title 3981.

Translation by sir Anthony Ashley (1551-1627) of Lucas Janz Waghenauer's *Spiegel der zeevaardt vande navigatie der westerche zee*. Leyden, 1584. *The Dictionary of national biography*, v. 2, p. 170, states: "Four years before the defeat of the spanish armada in 1588 there was published in Holland, the first known collection of 'Sea charts' for sailors, afterwards known as a 'waggoner' . . . It would appear that in the following year [1585] lord Charles Howard, of Effingham, lord admiral of England, drew the attention of the privy council to the work, which met a great want of our early seamen under the Tudors. The work being 'esteemed by the chief personages of the grave counsell worthy to be translated and printed into a language familiar to all nations', the task of translating it into english from the dutch was committed into the hands of Anthony Ashley."

Concerning the original work, Nordenskiöld, in his *Periplus*, p. 107, states: "A new period in the history of sailing-directions as well as in that of charts begins with Lucas Janszoon Waghenauer of Enkhuysen. His two celebrated

Waghenaer, L. J.—Continued.

works *Spiegel der zeevaerdt* (1st ed. 1584) and *Thresoor de zeevaert* (1st ed. 1592) contain sailing directions in the text, besides nautical instructions, etc. In the first these directions are rather brief, and are accompanied by short statements as to the trade and chief products of the various countries. Here we find for the first time in printed literature a direction for sailing along the east coast of Sweden to Stockholm . . . " In his *Fac-simile atlas*, page 50, he further states: "The first part of this marine-atlas begins with a short treatise on the principles of navigation, followed by a general map of western Europe on the equidistant projection of Marienus, provided with a number of compass-roses, and intersected by compass-lines. Then follows 22 special maps of the coasts between Enkhuysen and Cadiz. The second part contains, besides the text, 21 maps of the coasts of the North Sea and the Baltic. The special maps are not graduated but are provided with compass-roses and generally also with a scale in Spanish and German miles; one degree is stated to contain $17\frac{1}{2}$ of the former and 15 of the latter. In several places on the maps the soundings are given. This work is the finest collection of sea-charts published in print. It was much appreciated among the sea-faring nations of Europe, and published in a number of editions in various languages . . . Evidently the work is partly based on Italian or Catalan portolanos, and partly on ancient sailing directions for the Baltic. The same work was also published in Leyden in 1592 and 1598 in oblong folio with double-folded sea-, or coast-charts, of size 195 x 555 . . . "

"En 1584 Plantin publia à Leyde la première édition du" *Spiegel der zeevaerdt* par Lucas Jansz. Waghenaer, renfermant 23 cartes maritimes gravées par Joannes a Doetecum. L'ouvrage fut exécuté entièrement aux frais de l'auteur et imprimé sur le papier acheté par Plantin pour le grand Antiphaire d'Espagne. La même année, il fit paraître une édition de cet ouvrage, en deux parties, contenant 44 cartes. En 1585, Plantin imprima une troisième édition, semblable à la seconde, et Raphelengien en publia une quatrième édition. En 1586, ce dernier fit paraître une traduction latine du *Spiegel der zeevaerdt*, faite par Martin Everaerts de Bruges, renfermant le même nombre de cartes que les trois éditions néerlandaises précédentes. Cet atlas de cartes maritimes, le premier qui parût, eut un succès énorme et de nombreuses éditions en différentes langues, postérieures à celles que nous venons d'énumérer, virent successivement le jour." M. Rooses', *Christophe Plantin. Anvers, 1832, p. 355.* The maps comprising this work are of special interest, being classed among the earliest specimens of copper-plate engraving in England. They are uncolored, in this copy, but are most elaborately executed and embellished with ornamental cartouches, ships, fish, etc. The engravers were Jodocus Hondius, familiar as a map engraver and publisher of atlases;—Johannes Rutlinger, engraver of a large portrait, now excessively rare, of Queen Elizabeth;—Augustine Ryther, engraver of charts illustrating the Spanish armada;—and Theodore de Bry who signed the title-page in addition to nine maps.

The title page is substantially the same as that, by Joannes a Doetecum, in the first edition of the work in Dutch, as reproduced in Rooses' *Christophe Plantin*, pl. no. 91. Only minor changes such as the substitution of figures and ornaments were made by De Bry. "The other batch of plates done and signed by De Bry on his second journey to England in 1588 are still humbler and more journeymanlike in character. It was in the months following the Armada: navigation and exploration, ocean-trade and ocean-warfare, were more and more occupying men's thoughts in all the countries of western Europe, and especially in England. The time was opportune for the publication by

Sir Anthony Ashley, clerk of the privy council, of an English translation on which he had been employed for several years, of an important dutch work on navigation . . . by Lucas Wagenaer of Enkhuizen. The title-page and most of the sea-charts in the original edition had been engraved by J. van Duetchum. For Ashley's translation several hands, including De Bry, Ryther and Jodocus Hondius, were employed to copy them with slight modifications. Ashley, in his epistle dedicatory to the lord chancellor, sir Christopher Hatton, speaks slightly of these engravers as follows: 'By reason of my daylie attendance on your l. and the rest of my lordes of her maiesties most honorable privie counsell, I was forced to take such time for this worke, as I could, by stealth, both for the translation it selfe, and for the overseeing of the negligent gravers: besides many other my perticuler and private lets.' It is odd to find so famous a craftsman as Theodore De Bry reckoned a negligent engraver." Sidney Colvin. *Early engraving & engravers in England. London, 1905. p. 40.*

This copy is complete with the exception of the revolving diagram, on recto of l. B₃, which is supplied in facsimile from the British Museum copy. When the strings of these volvelles break, the diagrams are invariably lost.

"Le pilote Luc Jansz. Waghenauer na quit à Enkhuizen, vers le milieu du xviii^e siècle. Les particularités de sa vie et la date de sa mort sont inconnues. Il était l'ami du célèbre franc. Maelson (dont le père se nommait Pierre Maek-schoon), savant helléniste, docteur en médecine, pensionnaire de la West-Frise, ambassadeur, etc. Au nombre de ses amis, Waghenauer comptait encore le nom moins célèbre navigateur Jean Huygen van Linschoten, plus tard trésorier de la ville d'Enkhuizen. Dans ses ouvrages, Waghenauer cite avec reconnaissance le nom de ces deux amis, et appelle Maelson son mécène."

"La réputation que Waghenauer avait acquise de son vivant ne fit que grandir après sa mort. Ses œuvres eurent une vogue extraordinaire, du reste parfaitement justifiée. Au xviii^e siècle, les marins anglais appelaient encore un routier: a Waghenauer" [a waggoner] F. van der Haeghen. *Bibliotheca Belgica. W. 47-69.* See same for other editions of this work.

NOTE.—This is the *Galliæ tabule geographicę*, and *Belgii inferioris geographicę tabule*, engraved title-page, maps and text, probably taken from the 1606 edition of *Gerardi Mercatoris atlas sive cosmographicę meditationes de fabrica mundi et fabricati figura*.

The pagination 121–195 does not quite agree with these parts in the 1607 edition, much of the text being in different type.

The date 1605 occurs in the border text on map no. [22] *Flandrię pars orientior*, showing that these are not from the earlier parts of Mercator's atlas, nor from the edition published in 1602.

For account of the various editions, consult v. 1, no. 422. Map no. [29] *Luttenburg & Trier*, is wanting.

NOTE.—Maps unsigned, without titles or descriptive text. Eleven maps are circular excerpts from a large map of Europe on spherical projection. Prototype of this map was made by Hondius in 1619 and published in succeeding editions of the Mercator atlases. The circular extracts are from a re-engraving of the Hondius map with translation of a few conspicuous names into english. Alternating with these are 11 maps of ancient Europe, of trapezoid shape based on maps in Ptolemaic atlases between 1548 and 1621.

NOTE.—Engraved title-page for complete work shows pictures of *England's famous discoverers*.—*Sr. Fran: Drake*, *Mr. Tho: Candish*, etc.; also view of London and allegorical pictures of *Thames* and *Medway*. Following title in

center: *The english pilot: describing the sea-coasts, capes . . . in the northern and southern navigation, shewing the courses and distances . . . and many other necessary things belonging to the practical part of navigation, being furnished with new and exact draughts, charts, and descriptions; gathered from the latest and best discoveries that have been made by divers able and expert navigators of our english nation, collected for the general use of our countrymen, by John Seller, hydrographer to the king . . .*

Preface states work is divided into four books, dealing with the northern, southern, oriental and american navigation, respectively; and that "it is the first essay of this nature performed in England". The *Dictionary of national biography*, v. 51, p. 228, says of this edition: "Notwithstanding the declaration on the title-page of the '*English pilot*' that it is 'furnished with new and exact draughts, charts, and descriptions gathered from the experience and practice of divers able and expert navigators of our English nation,' the maps and charts were taken from the Dutch, and were, in many instances, printed from the Dutch plates, from which the original Dutch title had been imperfectly erased, and an English title, with Seller's name, substituted."

Alexander Dalrymple, in the *Advertisement* to his reprint of *The nature and properties of the winds and moussons in the navigation from England to the East Indies . . . by John Sellers*, published in his *Collection of memoirs of charts of . . . the East Indies*, says:

"The Work of *John Seller*, from which This Account of the Winds was taken, is entitled '*THE ENGLISH PILOT. The 3d Book. Describing the Sea-Coasts, Capes, Headlands, Straits, Soundings, Sands, Shoals, Rocks, and Dangers--The Islands, Bays, Roads, Harbours and Ports in the Oriental Navigation.*'"

"It is *very rare*, for I have never seen but *two Copies*, both in my own possession; but *both imperfect*, The *Letter-Press* ending at P 24, with a *Catch-word*, *This*. One Copy wants also an *intermediate Leaf*. If any Person has a *complete Copy*, I shall be much obliged by the permission to transcribe what my Copy wants.

"I have collated *John Thornton* 1703, who has copied *Seller*, almost *verbatim*, even to the *Title Page*, inserting *his own name* instead of *Seller*, without the slightest notice of having copied *Seller*: A more barefaced *Plagiarism* I have not seen! I have also collated the last Edition in my possession, viz., 1761, in which *Moussons* is called *Monsoons*, and some trivial alterations in expressions."

Mortier, D.—Continued.

In v. 2, besides the t. p., is an engraved title: *Ecclesiarum Angliæ et Valliæ prospectus or views of all the cathedrals in England and Wales . . . accurately engraved on 40 copperplates . . . I. Cole sculp. London, for J. Smith, 1719.* This title contains a view of Saint Paul's, engraved by H. Hulsbergh.

Evidently a made up copy, containing preface by Joseph Smith dated 1724, from which the following is translated:

"The volumes are in all respects the same as those of David Mortier of Amsterdam, excepting the plates which have been inserted . . . engraved by Knip and Kniff."

These plates are of later date than the title-pages. Several of the plates have the following: *Printed & sold by J. Smith at ye sign of Exeter change in ye Strand.*

In v. 2, p. 24, is a list of *Books printed for, and sold by J. Smith.*

In Graesse's *Trésor de livres rares . . . 1900 v. 4, p. 693*, is found the following notice: "Cet ouvrage, qui ne contient guère que des planches, a d'abord paru à Londres chez David Mortier avec un titre anglais (précédé des mots *Britannia illustrata*) daté de 1707 et un titre franç. (*Nouveau théâtre*) daté de 1708 pour le t. 1; les autres volumes se sont publiés successivement: on en trouve à la date de 1709, 1715 et 1716, et dans l'éd. de 1724 même; le 3^e vol. a un titre *Ecclesiarum Angliæ et Valliæ prospectus* daté de 1719. Les premières éditions, contenant de meilleures épreuves des planches que la dernière, sont celles qu'on préfère, surtout lorsqu'il s'y trouve les 25 fig. de plans et élévations de Audleyende, gravées en 1676 qui ont été détruites avant qu'il ait pu en être tiré de nombreuses épreuves."

The plates in vol. 1 were engraved by J. Kip from drawings by Leonard Kniff.

The plates in the 2nd part of vol 1, with a few exceptions, were both drawn and engraved by Kip, hence the work is often known by his name. The 3d and 4th vols. are by different artists.

The *Atlas*, by G. Valck and P. Schenk, has special t.-p.: *Atlas Anglois, ou Description générale de l'Angleterre . . . avec les généalogies des plus illustres familles . . .*

The supplement contains, among others, 27 plates by Henry Winstanley, some dated 1676-80, including those of Audley End and that of Eddystone lighthouse. Imperfect: genealogies of vol. 4, wanting.

Maps and plates by various engravers, including J. Collin, D. Loggan, J. Spilbergh, Sutton Nichols, T. Johnson, H. Hulsbergh, I. Sailmaker, I. Badeslade, I. Harris, H. Winstanley.

In v. 3, several plates have the imprint of Henry Overton.

NOTE.—The engraved title contains a small map of the British Isles.

The *Dictionary of national biography* states: Greenville Collins, "captain in the royal navy and hydrographer, was in 1679 appointed commander of the *Lark*, a small frigate, apparently in some connection with the duties of the Trinity House, of which Collins was a younger brother. In 1681 he was ordered to survey and chart the coasts of the kingdom, for which purpose he was appointed to command the *Merlin* yacht. This survey occupied the next seven years, the charts being published from time to time as ready, and it was not till 1693 that he was able to issue them collectively in a large folio, together with sailing directions, under the title of '*Great Britain's Coasting Pilot*.' The scope of the work, embracing as it does, the complete circuit of Great Britain, is very great, and for one man in seven, or in twelve, years excessive. The charts have not, of course, the rigid accuracy of those of our own time, and some of them are possibly edited from dutch originals; but with all their shortcomings they are an enormous advance on anything before them, and entitle Collins to rank not only with the earliest but with the best of english hydrographers. The '*Coasting pilot*' was printed by a namesake, Freeman Collins, who may have been a brother".

HARBORS.

Ozanne, N. M.

Nouvelles vues perspectives des ports de France dessinées pour le roi, par m. Ozanne, ingénieur de la marine. Gravées par Y. Le Gouaz . . . 1 p. l., 1 map, 60 pl. obl. 4°. Paris, Le Gouaz [1783-1791 ?] 4017a

NOTE.—The engraved title page represents a ship at full sail; at the base of the title are the emblems of royalty with ornaments. Under each view is found a vignette representing a globe with three fleurdelis, surmounted by a crown, and surrounded by flags, masts, helmet, etc., with the mention that the view is either taken or reduced from the *Collection des ports de France dessinés pour le roi en 1776*. Par le s^r Ozanne, ingénieur de la Marine pensionnaire de sa majesté.

It is evident that all the views did not appear successively. The order of appearance is indicated by the numbers at the bottom of the plates; these run irregularly, dating from 1783 to 1789. Some are not by Ozanne; six bear the signature of Lomet; these are:

- no. [41] Le port des sables d'Olonne ...
 " [42] Le port de St Martin de Ré ... 1784.
 " [43] Le port de la flote dans l'isle de Ré ... 1787.
 " [46] Le port d'Oleron ... 1783.
 " [47] Le port de Royan ... 1787.
 " [51] Le port de St Jean de Luz ... 1788.

One bears the name of Bonnard du Hanlay:

- no. [37] Le port du Croisic ... 1786.

Two bear the name of Cazin:

- no. [8] Le port de St Valery en Caux ... 1786.

- " [9] Le port de Fécamp ... 1786.

The map was made by Macquet in 1791. It bears the note: "Ces dessins n'ayant point été gravés de suite, les n^{os} qui sont au bas de chaque planche indiquent seulement l'ordre dans le quel ils ont été mis en vente ..." The table on the right of the map contains a systematic index of the ports from north to south and from east to west.

Ozanne, N. M.—Continued.

For a more detailed account of this work and its different editions see *Une famille d'artistes bretois au XVIII^e Siècle. Les Ozanne, par Charles Auffret. Rennes, 1891.* Here we find that the first edition was printed without date in 1780 with a title very like the above and agreeing very largely in its description: *Nouvelles vues perspectives des Ports de France, dessinées pour le roi, par N. Ozanne, ingénieur de la marine, gravées par Y. Le Gouz, à Paris chez Legouaz, r. Ste-Hyacinthe, n^o 4.* Another edition containing title, 128 pages of text, 60 views of the ports of France, 2 plates engraved by Bovinet representing *la ville des Cayes*, appeared in 1819 with the title: *Vues des principaux ports et rades du royaume de France et de ses colonies, dessinées par Ozanne et gravées par Gouz* (sic) *avec un texte descriptif, géographique et statistique par N. Ponce; à Paris chez Bance aîné, marchand d'Estampes, rue Saint-Dominique, 214. 1819.* A mediocre reproduction of this work appeared with the title: *Collection des vues des ports de France et autres d'Europe, avec les environs, leurs bâtimens, ce qui est utile aux élèves et amateurs de la peinture et architecture.* No date is given; 38 plates of Ozanne, although sixty were probably reproduced, are recognized among the inferior engravings of Punt, Testolini, Gabrieli, Canali, etc. Another edition of quarto size the author considers too inferior to describe in detail.

LINGUISTIC.

Gilliéron, J., and Edmont, E.

Atlas linguistique de la France . . . 2 p. l., iii, 1920 (i. e. 2048)
 maps in 17 portfolios. fol. Paris, H. Champion, 1902-1910. 4020

NOTE.—Accompanied by: *Atlas linguistique de la France; notice servant à l'intelligence des cartes.* 55, [1] pp. 4°. Paris, H. Champion, 1902.

"Couronné par l'Académie des Inscriptions et Belles-Lettres (*prix Chavée*) et par l'Académie de Berlin (*prix de la fondation Diez*)"

"L'*Atlas* déborde les frontières politiques de la France pour englober non seulement la Belgique wallonne et la Suisse romande, mais quelques vallées du Piémont et les fies anglo-normandes de la Manche. Dans ce vaste domaine, l'enquête a été faite par l'excellent auteur du *Lexique Saint-Polois*, M. E. Edmont.

"L'*Atlas* est composé de 1.920 cartes de la France, où chacun des parlers étudiés est représenté par un numéro d'ordre. Chaque carte est consacrée à un seul mot: la forme propre à chaque patois est placée à côté du numéro qui le désigne. Elle est notée à l'aide d'un alphabet plus complet que le nôtre et plus propre à assurer l'exactitude nécessaire de la transcription, mais assez simple pour que l'exposé en tienne en quelques lignes et que la lecture n'en soit nullement gênée.

“La richesse des matériaux recueillis dans l'*Atlas* est extrême. Elle suscite des études de géographie linguistiques toutes nouvelles où l'on passe de la philologie à l'histoire. Des entreprises de ce genre sont commencées en Allemagne, en Suisse, au Canada. Et si l'on consulte des programmes des Universités, l'on voit que beaucoup d'éminents professeurs y ont inscrit l'étude de telle carte de l'*Atlas* linguistique dont les remarques ingénieuses, nouvelles et nombreuses suffisent à l'enseignement d'une année.

... “Une note jointe au 35^e et dernier fascicule annonce la prochaine publication de la *Table de l'Atlas*. En fait, ce n'est pas seulement la table alphabétique complète des formes ou types contenus dans leurs 1.920 cartes que nous donneront MM. Gilliéron et Edmont. Le volume complémentaire, actuellement en cours d'impression, contiendra, en outre cette table très considérable et le documents de l'enquête (points explorés, sujets interrogés, questionnaire, etc.) une masse de matériaux pour lesquels on a jugé inutile de dresser des cartes tableaux morphologiques, mots recueillis sur un nombre restreint de points etc. Nous souhaitons la prompte apparition de ce volume complémentaire qui rendra plus facile et plus fructueuse l'utilisation d'une œuvre dont la science française peut légitimement s'enorgueillir.” (*Romania*, octobre 1910)

NOTE.—Engraved title-page and plate. Double page plate follows t. p.; the center figure is an equestrian statue of Louis XIII, beneath which his courtiers are represented as homagers. Near the lower right hand corner is the following: *N. Picart fecit. A Paris, chez N. Berey au bout du neuf proche les Augustins, avec privilège du roy.* Imprint date is 1640; maps are dated 1625-1643.

A collection of maps by various cartographers including: Bertius, Hondius, Jansson, Baudouin, Blaeuw, Danquerts, Surhon, Sanson, Almada, Boisseau and Tassin. A number of maps of the various provinces of France, without signature, are probably by Tassin. The presumption is that the atlas contained originally only maps by Tassin, all of which were devoted to Europe. It is probable that the maps by other cartographers, referred to above, were inserted. no. [1] *Le plan de la ville, cité, université et faubourgs de Paris.* In the four corners are the portraits of Louis XIII, Anna of Austria, le Dauphin and the duke of Anjou. In the lower right hand corner is the following: *A Paris chez Nicolas Berey enlumineur de la reine demeurant proche les Augustins au bout du pont Neuf, 1641.*

This plan is especially noted and described by m. Edgar Mareuse, in the *Bulletin de la société de l'histoire de Paris et de l'Île-de-France.* 1900. v. 27, pp. 161-162.

Keere, P. van den—Continued.

Petro Montano. 4 p. l., 90 (i. e. 72) l., [2] l. incl. 24 col. maps, 1 pl. fol. Amstelodami, impensis P. Kaerii, 1622. [Colophon] Amsterdam, P. Keere, 1621. 4048

NOTE.—First published with latin text in 1617. A latin and a french edition followed in 1622.

Title states that in the 1622 edition the map entitled, *Caerte van't Vrye sijnde een gedeelte en lict van Vlaenderen . . . verbeterd door C. J. Visscher*, was substituted for *Flandriae pars orientalis*, which appeared in the earlier edition.

The Visscher map illustrates the war of 1621–1622 and appears in the latin edition, 1622. The french edition contains the original map. Consult v. 1, title 3075.

Montanus wrote the descriptions, dedication and preface.

The engraved, colored title-page is very elaborate, being ornamented with figures in the costume of the times and with the shields of the seventeen provinces. A plate gives five engraved, colored views of the manners and customs of the ancient Belgians.

The maps are also very elaborate and show the inhabitants in the costumes of the different provinces, and on each map of a separate province a small, colored sketch of the principal city of that province is given.

The names of Martini, Surhon and Emmius appear on several maps. One map is dated 1608, two are dated 1616 and a number of others 1617.

The map entitled, *Le lion Belgique*, is an unusual one. The idea of such a map was not original with Keere. The description states that Michel Aitzinger or von Eytzing, an austrian, in a map in his history of Belgium in 1587, first made use of the likeness to a lion in the topography of the seventeen provinces; added to the fact that all but four of them showed the lion on their coats of arms as did many of the cities, towns and noted families. On Keere's map of the *Leo Belgicus*, Friesland and Groningen form the head; Overysse, the tongue; Utrecht, Holland, Zealand and Flanders, the back; Zutphen, the jaw; Gelderland, the chest; Brabant, Mechlin and Hainault, the shoulder; Limburg, the knee; Luxemburg, the foot; and Artois, the tail.

A map showing a plan and view of Antwerp is entitled, *Marchionatus sacri Romani imperii*.

NOTE.—Index to maps on title-page. Title-page and most of the maps engraved by Jean Harrewyn. Several maps engraved by P. Devel. The maps were published separately from 1703 to 1712.

The atlas was republished with modifications and additions at Paris in 1744.

Extensive notice of Eugene Henri Fricx, by Alphonse Wauters, appears in *Biographie nationale publiée par l'Académie royale des sciences, des lettres et des beaux-arts de Belgique*. Neither the date of Fricx' birth or death is given, but it is stated that in 1727 he still carried the title "d' imprimeur du roy," and that in 1733 his villa was sold by his heirs; his death therefore must have occurred between those two dates.

The following is quoted from K. Waliszewski's *Peter the great, New York, 1897, p. 455*: "Two officers of his fleet, Ivan Lévreinof and Féodor Loujin, started, in 1719, on an exploring voyage to the coast of Kamschatka, with orders to seek for the solution of a problem suggested by Leibnitz—Were Asia and America united on that side, or did the sea lie between them? The only result of this first expedition was a map of the Kurile Islands, but Peter returned to the charge, and in 1725 the straits, which still bear the name of the bold explorer, were discovered by Behring.

"In the Records of the Paris academy we find mention made, by the elder Delisle, of a map of the Caspian Sea and the surrounding provinces, which Peter had shown him in 1717, and which, though not absolutely correct, did much to rectify the contemporary Western idea of those countries. In 1721 thirty cartographers were already working independently in different provinces in Russia. The instructions given them by Peter were characteristically scanty. 'The latitude of each town will be taken by the sun-dial, and you will then work in a straight line to every point of the compass, up to the frontier of each district.' Yet some work was done. Special explorers were also sent out, lieutenant Gerber to the Northern Caspian, dr. Messerschmidt and Tabbert, a swedish prisoner, better known under the name of Strahlenberg, to Siberia. Florio Beneveni, an italian, travelled into Persia and Bokhara and to Khiva, while lieutenant Buchholz and major Liharef followed the course of the Irtych. The secretary of the senate, Ivan Kirillof, was ordered to use the information thus collected for the compilation of a general atlas, on which he laboured till 1734, and which is a work of considerable value."
